**BABYCATGIRL INTRODUCTION** 

The summer of 2021 has seen an explosion in the popularity of MemeAnimal crypto projects. BabyDoge, Kiba, Floki, Dogelon amongst others saw huge gains in the space of a few months. Whilst successful they all have one flaw in common...they are all overly complex for your average Joe. Introducing...BABYCATGIRL! The simple way to invest, and earn!

### PERKS OF BABYCATGIRL:

- Unlike most ERC20 tokens, ours comes with a robust use case, not only can you download our Mobile app to swap tokens, but vise-versa token holders will get special access, and perks in-app
- 5% of each transaction goes directly to marketing to increase our holder base and provide a bigger crowd for launching mobile app
- 5% of each transaction goes directly into building, curating, and developing our Metaverse (Ask us in an AMA how!)
- Unlike most "promising" projects with nothing more then a skin on a swap, ours will have a robust mobile app to pair along with it
- \$BBYCAT is the answer to the age old question: Will we ever have public adoption of ERC20 Tokens? \$BBYCAT provides unique benefits to holders, and large marketing reach to finally break through the glass ceiling.
